

CERTIFICATIONS and Green Initiatives

ARE DESIGN-CRAFT® CABINETS KCMA CERTIFIED?

- KMCA has a product performance standard for the cabinet industry.
- Design-Craft cabinets are KCMA compliant and certified.
- For more information visit the KCMA website at www.kcma.org.

ARE DESIGN-CRAFT CABINETS ESP CERTIFIED?

- ESP, Environmental Stewardship Program, is a product sustainability certification for the cabinet industry.
- Design-Craft cabinets are ESP compliant and certified.
- For more information on ESP visit www.kcma.org/certifications/environmental-stewardship.

ARE DESIGN-CRAFT CABINETS LEED® CERTIFIED?

- Design-Craft is a responsible manufacturer utilizing sustainable processes that may contribute towards LEED points.
- Buildings can obtain LEED certification by using products that tribute LEED points.
- Visit the U.S. Green Building Council website for more details at www.usgbc.org.

ARE DESIGN-CRAFT CABINETS FSC CERTIFIED?

- There are more than 50 forest certification programs available worldwide.
- Some of the woods Design-Craft uses are SFI certified rather than FSC.
- SFI values include protection of biodiversity, species at risk and wildlife habitat, sustainable harvest levels, protection of water quality and prompt regeneration.
- Visit the SFI website for more details at www.sfiprogram.org.

ARE DESIGN-CRAFT PRODUCTS MADE IN THE USA?

- All Design-Craft cabinetry is built in the USA using domestic hardwood and plywood sourced from sustainably managed American forestlands.
 - Keeping production here in the USA creates thousands of jobs, supporting both local communities and the domestic economy.
 - We have been American-owned and operated since our founding almost a century ago, and we take pride in our continuing commitment to American workers and American quality.
-

ARE DESIGN-CRAFT CABINETS TSCA TITLE VI & CARB COMPLIANT?

- The US EPA & California Air Resource Board (CARB) set and manage standards for air quality including formaldehyde emissions from composite wood panels.
 - Design-Craft cabinets are manufactured from TSCA Title VI & CARB compliant and certified materials.
-

DOES DESIGN-CRAFT USE FORMALDEHYDE?

- Design-Craft makes a difference with our products by partnering with suppliers to ensure continued environmental stewardship. We select materials manufactured to meet or surpass current regulatory requirements, including low formaldehyde emissions.
 - All of the wood we use complies with TSCA Title VI & CARB formaldehyde emission standards.
-

ARE DESIGN-CRAFT CABINETS GREEN?

- Our products are KCMA and ESP certified which means our materials and processes are qualified accordingly.
- Our paint curing ovens utilize the latest in light technology making them 50 percent more efficient than conventional gas ovens.
- All sawdust and wood shavings generated in our manufacturing process are recovered through a filtration system, removing 99.99 percent of dust particles. This eliminates virtually any discharge of wood dust into the atmosphere and it returns warm air back into the factory, conserving energy.
- The air filtration system in our paint department removes 99.97 percent of particulate matter, keeping our air clean inside and out.
- By deploying these innovative technologies in our facilities, we've dramatically changed the way wood finishes are prepared for application which helps reduce waste by minimizing disposal of unused material.
- Our enhanced Styrofoam corner protectors are made from ARCEL resin which can be recycled at your local recycling center that accepts EPS foam (SPI code #6 polystyrene PS).
