

Smooth-Star in Total Eclipse

Reeb[®] Finish *PrismaGuard[®] Finish*

Handcrafted and professionally applied in a controlled environment, a PrismaGuard premium finish is built to last, giving you confidence and peace of mind. The premium finish undergoes rigorous testing with specialized equipment to help ensure it delivers a consistent high-end appearance with a low-maintenance coating that preserves the door's color for years to come.

- Designed for optimal performance with Therma-Tru fiberglass doors
- Features enhanced durability to protect from everyday wear and tear
- Enhances the overall beauty of the entry with a nature-inspired color palette of premium stains and paints

Classic Craft Fir in Dark Maple

Smooth-Star in Rio

Reeb® Finish *PrismaGuard® Stain*

A superior staining system for fiberglass doors that produces a uniquely realistic and durable finish. Skilled Reeb Finish craftsmen hand-brush each component of the door to enhance its deep embossments and authentic grain patterns. A dual top-coat highlights fine details and ensures superior endurance and protection from the elements.

Warranty: All finishes on fiberglass doors are backed by a 10 year limited warranty and Reeb's unmatched reputation for quality and customer service. Visit reebfinish.com/warranties for complete warranty information.

PrismaGuard® Stain

The Reeb® Finish Stain System

Classic Craft Oak in Driftwood

For the most accurate color representation, Reeb has developed 5 PrismaGuard Swatch kits – one for each grain type. Each kit contains 12 pieces of fiberglass skin in Reeb's 12 finish options. This portrayal gives the best visualization and understanding of the final appearance of the door.

Each component of the door unit is finished separately which produces a much more consistent result than trying to finish a pre-assembled unit. Each step in the carefully controlled process is crucial in crafting the most authentic, longest-lasting finish possible.

The 6-step process starts with a meticulous inspection and preparation, and moves to the application of four finish coats: a base coat, a stain coat which is hand-brushed, an initial top coat, and a final top coat. Together these provide maximum durability and protection. Lastly, the finished components are inspected, assembled and packaged for delivery.

Classic Craft Mahogany in Autumn Harvest

For more information on the Reeb Finish Stain System visit learn.reeb.com/knowledge-base/reeb-finish-stain-system/

Please note: The grain pattern on your door may effect its final color after finishing. See page 6-7 for more details. Due to the printing process, images shown are representative of the stain color and may vary from actual stain color.

How Grain Types Affect Finishing

Classic Craft® Doors with Different Grain Types

When a stain is applied, the grain type will have an affect on the door's final appearance. A wider grain (open grain) will appear slightly lighter, while a tighter grain (closed grain) will appear darker. Why? When stain is being applied, it concentrates on areas with more grain – the more grain, the darker the appearance of the stain. To help better understand the variation, a swatch of each grain is included with each stain color throughout the catalog.

Classic Craft® vs. Fiber-Classic® Doors

While Classic Craft® doors feature surface grain patterns modeled directly from natural wood, Fiber-Classic® doors instead feature a close interpretation of real wood. Even when applying the same stain color, this can have an effect on the door's final appearance.

PrismaGuard® Paint

The Reeb® Finish Paint System

Classic Craft Canvas in Rio

For the most accurate color representation, Reeb has developed Paint Swatch Sets. Each set contains 22 pieces of cladding finished in Reeb's 22 color options. This portrayal gives the best visualization and understanding of the final appearance of the door.

Each component of the door unit is finished separately which produces a much more consistent result than trying to finish a pre-assembled unit. Each step in the carefully controlled process is crucial in crafting the most authentic, longest-lasting finish possible.

The 5-step process starts with a meticulous inspection and preparation, and moves to the application of three finish coats: a base coat, an initial top coat, and a final top coat. Together these provide maximum durability and protection. Lastly, the finished components are inspected, assembled and packaged for delivery.

with Reeb Finish Aluminum Clad

Why stop at the door? With Reeb® Finish you can choose from a wide variety of options providing an entire pre-finished unit. Select either On-Guard™ composite or solid wood frames. A split finish allows for different colors on the exterior and interior side of the unit.

Interior

Reeb® Finish Paint door and sidelite

Frames

On-Guard™ Frames

To achieve the maximum level of protection for your entire door unit, we recommend using an On-Guard composite frame whenever possible.

On-Guard Composite Frames:

- Feature a 10 year warranty with Reeb Finish Stain or Reeb Finish Paint products
- Will not warp, splinter or rot
- Will not absorb water
- Require less maintenance than solid wood

On-Guard Oak Grain

On-Guard Straight Grain

On-Guard Smooth Grain stained in PrismaGuard

On-Guard Primed

Smooth Grain Frames

Smooth Grain is the application of PrismaGuard™ stain on a smooth On-Guard Primed frame. This option imitates the natural look of real wood with a 10 year warranty.

On-Guard Painted White

Pre-painted by manufacturer in white. Color will not match Reeb Finish white paint.

Wood Frames

Reeb Wood frames are a mill option wood which provide a strong, reliable foundation for a beautiful finish. When finished with Reeb Finish, Reeb Wood frames feature a 1 year warranty.

Reeb Wood stained in PrismaGuard

Wood Brickmould

Reeb Wood brickmould is a mill option wood which provides a strong, reliable foundation for a beautiful finish. When finished with Reeb Finish, Reeb Wood brickmould features a 1 year warranty.

Reeb Wood stained in PrismaGuard

Reeb Wood painted in white

Aluminum Clad

Aluminum Clad is a pre-painted finishing solution for jambs and brickmould which adds an attractive, clean look to your overall door unit. Designed from affordable aluminum coil stock, Aluminum Clad is formed into a covering with highly defined moulding details and a textured, easy-to-clean surface.

Moisture Management

The system was designed with the clad pieces overlapping, preventing moisture from accumulating beneath the cladding.

Secure Fit

The sides of the brickmould covers are angled for a tight fit while the edges are hemmed, or bent over themselves, to provide rigidity.

Rot Resistant

Aluminum Clad is used with FrameSaver® products, which were designed to resist rot and decay by using a composite block at the bottom, the most susceptible area of the frame.

Color Options

Aluminum Clad is available in the following colors, trade-matched to both Reeb® Finish Paint ■ as well as Larson® Storm Doors ■

Bright White ■

Anderson White ■

Cozy Cottage ■

Sandy Beige ■

Clay ■

Anderson Terratone ■

Eldridge Gray ■

Brown ■

Mocha ■

Forest ■

Black ■

Ask to see a Reeb® Finish Aluminum Clad Deck which includes actual clad samples. This should be used for the most accurate color representation.

Do We mention Larson Catalog?

Trade-Matched Colors

Reeb® Finish Paint colors are Trade-Matched to Reeb Finish Aluminum Clad and Larson® Storm Door colors.

What does Trade-Matched mean? Each paint color is applied to a different substrate and the end results are colors that are similar in appearance but not exact matches. Please view the color comparison chart to see which colors are trade-matched to each other.

Visitors to learn.reeb.com have free unrestricted access to engaging, high-quality lessons taught by recognized industry experts. In an industry filled with many complex choices and regulations, Reeb is committed to offering training to dealers and their staff to empower them to better serve their customers each and every day.

Having one spot to search and find information is important – that’s why certain search engine sites have become so popular.

We are working to add more articles that give you the answers you need about a product or product line. You can simply use the search bar or dive into the topics to find the answer to your questions.

Some people are visual learners so we created videos to better share the stories. Some discuss our product offerings and compare similar products, while others share information about a specific topic.

The Reeb® Learning Center has expanded with the addition of Learning Paths.

It can be tough to know where to start learning. A learning path is a collection of courses that a learner can progress through. Each course contains step-by-step lessons to teach you about doors from start to finish.

- Guided learning to boost your door knowledge
- Knowledge Checks help gauge understanding
- A Final Quiz tests the overall knowledge gathered
- Earn certifications for every course
- Earn rewards when completing a learning path
- System tracks all progress
- Need to stop and come back later? No Problem!
- Education anytime and anywhere
- Great resource for employees new to the millwork industry
